Technology Transfer Center

Acknowledgments

We are pleased to inform you that the Technology Transfer Center has been established in the Institute as of February 10, 1976. The establishment of TTC is a series of our efforts to help solve industry's bottlenecks in the transfer of technology and to respond actively to the Government's policy for encouragement of technology transfer.

When we note that our industry will have to have at least 9,000 items of technology transfer in the ten years to come, as can be analogized from the case of Japan, the establishment and operation of a specialized organ like TTC is deemed essential to effectively carry out such vast amounts of technology transfer in a short period of time.

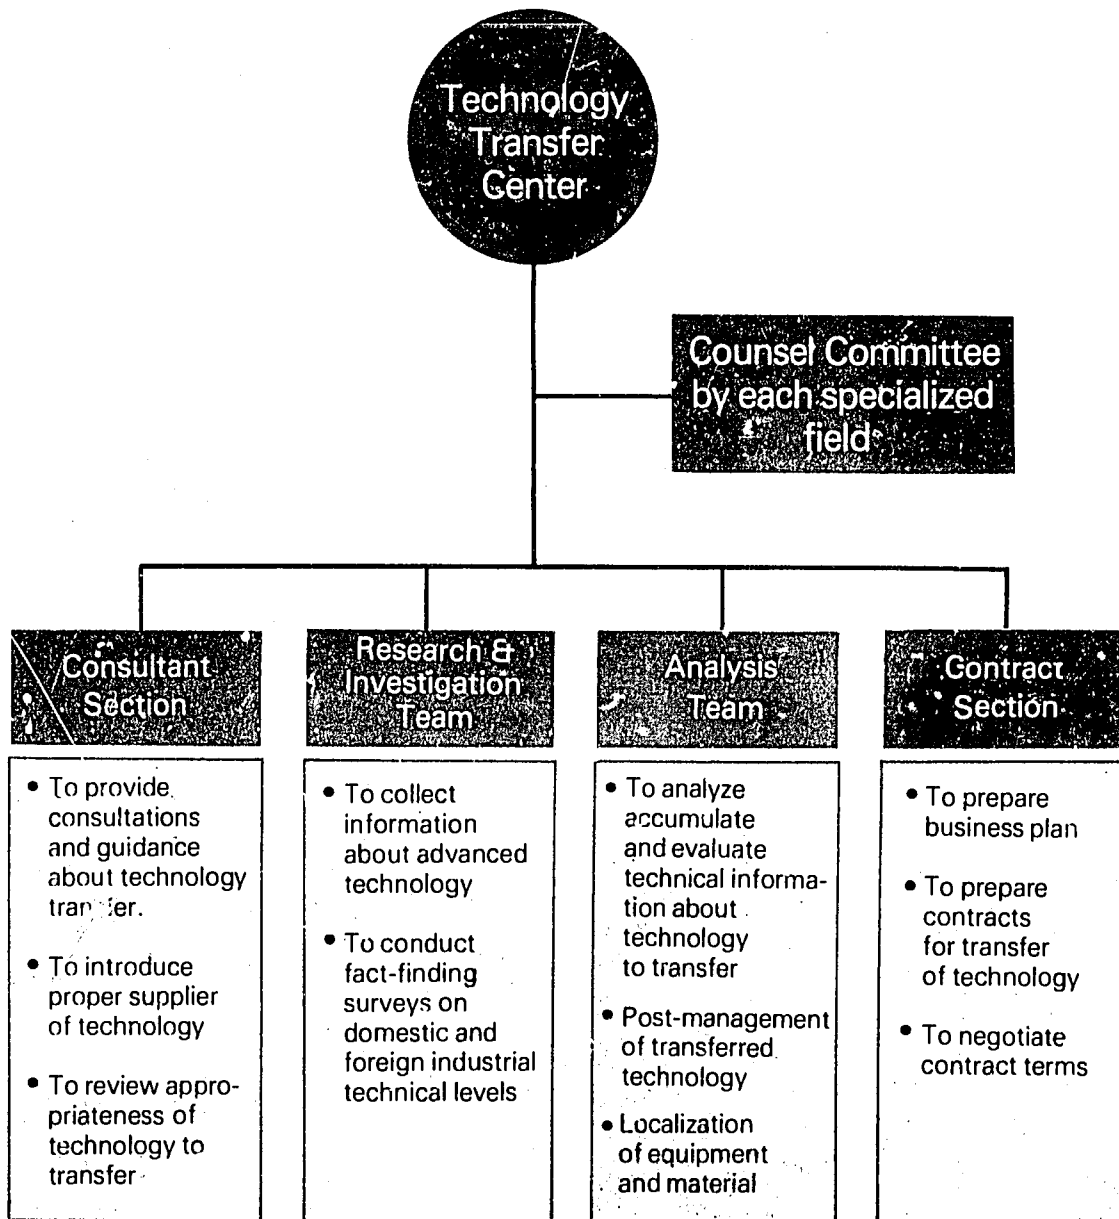

TTC is fully prepared and ready, in strong support of the government's policy for technology transfer and in close cooperation with the pertinent ministry and agencies, to serve you on any matters, including selection and introduction of appropriate technology, procedures for transfer, and even acting as an agent as far as technology transfer is concerned, so you are cordially requested to avail yourself of the unique functions of TTC.

1976, 2.

Technology Transfer Center

Organization

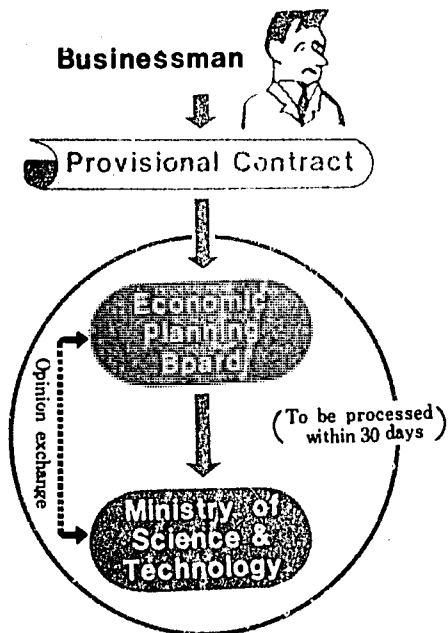

Scope of Business Activities

| | |
|--|---|
| Consultation, guidance and introduction of technology | <ul style="list-style-type: none">• To consult and select source of technology• To check adequacy of technology and settle the cost• To prepare contracts |
| Review of appropriateness of technology to transfer | <ul style="list-style-type: none">• To review appropriateness of technology to transfer• To eliminate unfavourable terms of contract |
| Acting as an agent for technology transfer | <ul style="list-style-type: none">• To prepare programs for technology transfer• To prepare technology transfer contracts |
| Promotion of joint technology transfer for minor industries | <ul style="list-style-type: none">• To introduce identical technology for the interests |
| Accumulation, analysis, evaluation, and dissemination of technical information for transfer of proper technology | <ul style="list-style-type: none">• To collect, analyze and circulate various technical and economic information and data on technology to transfer• To establish information flow system with international organizations |
| Promotion of research for assimilation and improvement of imported technology | <ul style="list-style-type: none">• To introduce proper institute to perform research for assimilation and improvement of imported technology• To furnish technical information necessary for such research• To help engineers and technicians to acquire necessary training in transfer technology |
| Post management of imported technology and presentation of technology transfer policy approaches | <ul style="list-style-type: none">• To make a periodical survey of imported technology• To recommend effective technology transfer policy approaches |

Steps for Review of Technology

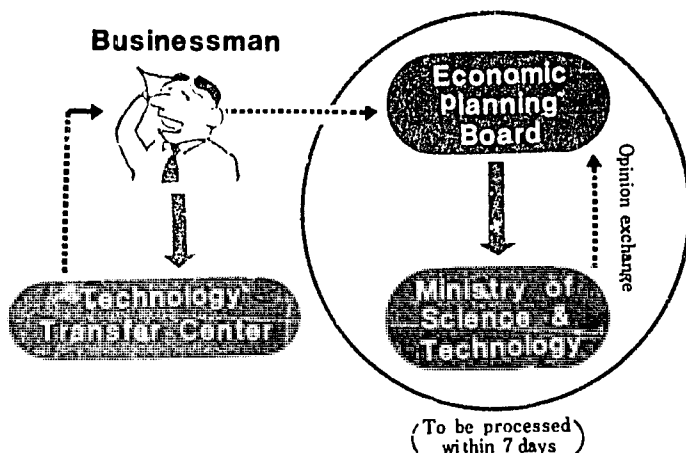

< Prior review >

Problems in post-investigation system

- A long period of time needed for technology transfer
- Heavy reliance on one country for technology donors
- Frequent conditional licenses by the government to technology
- Duplicated technology transfer by the interests

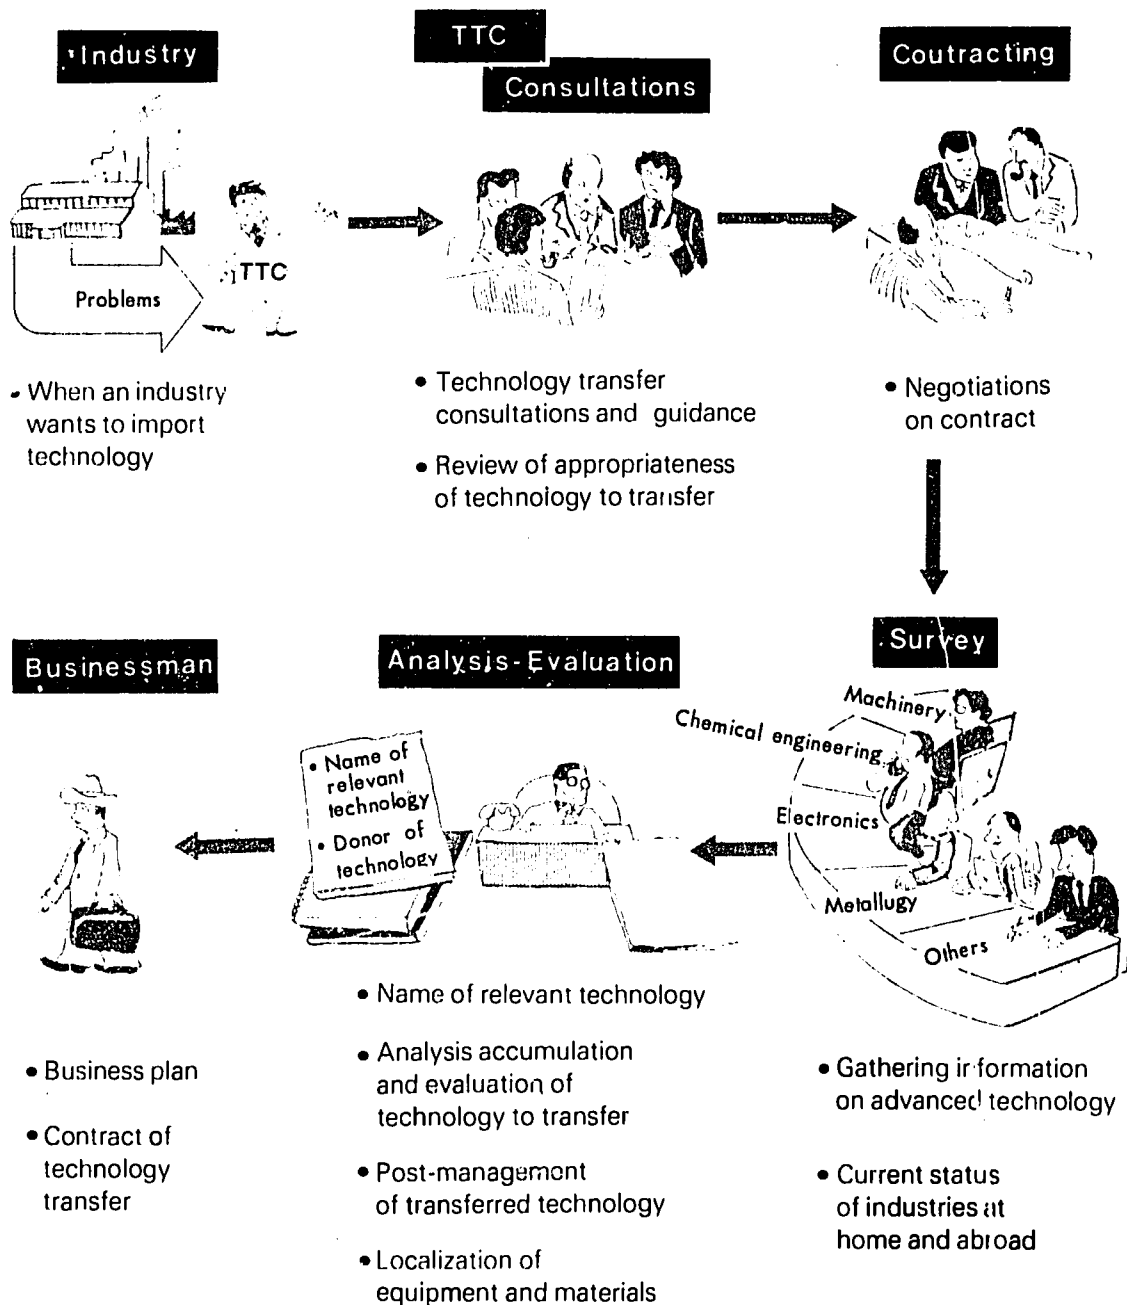

< Post review >

Advantages of prior investigation of technology transfer through TTC

- To save a considerable amount of time and money required for technology transfer
- To transfer optimal technology and to save royalties
- To obtain speedy and accurate information about technology transfer
- To eliminate unfavourable terms of contract
- Effective post-management of transferred technology and its assimilation
